SUMMERVILLE, S. C.
"The Flower Town in the Pines"

In the heart of the Azalea center of the South, is found this beautiful town—nestling among the tall Pines and lovely moss draped Oaks. Beautiful the whole year around, it is most beautiful in the spring, a veritable Paradise, flowers of all kinds, and especially among these are found the Azaleas, with its mass of flowers in colors of white, rose, pink, salmon, purple, red, orange and many varieties variegated in different shades. Here is also found the Camellia Japonica, covered with their beautiful flowers of various colors.

In this, the Flower Town in the Pines, we find the three original plants of our own Pride of Summerville, so named by us for this beautiful and unusual town. Being propagated by us, we class it as our outstanding Azalea of the Indica species.

In Summerville, we have set out over twenty-eight thousand Azalea plants in the Municipal Azalea Gardens of the Indica, Japanese and Kurume group, besides Camellia Japonicas and other evergreens. Visit our Town and see for yourself the beauty that is indescribable, also visit the Azalea Gardens, no admission is charged and visitors are always welcome. Then visit our Nursery, where we have hundreds of thousands of Azaleas, and see where all these beautiful plants are grown. We also have a formal Azalea Garden here at our Nursery, from which you can form ideas for the planting of your own garden—for no garden is complete without this lovely evergreen shrub—"The Azalea".

Bird Sacrarium at Municipal Gardens--showing pool,
feeding trays and shrubbery

AZALEAS

Azaleas come first and highest among the flowering evergreen shrubs and are without a doubt the most beautiful flowering plant we have in the South. No other shrub adds that touch of beauty, giving such a variety of colors, at that season of the year. They have a long blooming season, beginning in the winter and extending into June. In planting a garden they are unequalled and no garden is complete without a number of these flowering shrubs. All Azaleas are profuse bloomers and every plant is a mass of color during their blooming period. Azaleas may be used as specimen plants, in the foundation planting in the shrubbery border, or in beds by themselves.

The Indica, Japanese and Kurume species are outstanding among the Azaleas. The Indica Azalea, originally imported from India, is the tall fast growing type; producing large showy blooms in various colors. The Kurume is not as fast growing as the Indica, but of more compact form, the flowers being smaller of the hose-in-hose, single and double type and are very profuse bloomers.

We now offer a large stock of the best selected varieties of the Indica, Japanese and Kurume Azaleas. All plants from the smallest to the largest size are well rooted, bushy, healthy and strong and will give entire satisfaction in every respect.

AZALEA INDICA

The Azalea Indica is one of the fastest growing type, with masses of large flowers covering the entire bush, and during their blooming season are a beautiful sight, being unrivaled by any other flowering shrub. The Indica Azalea can be safely grown in any climate where the temperature does not go below 10 degrees.

SALMON

Pride of Summerville — Midseason. Fast, bushy grower. So unusual is its pure salmon-pink color, its leaf and other characteristics that we have established it as our leading variety. 8 in. to 20 to 24 in. to 3 ft.

Nora Lee Salmon—Late. Low, bushy compact plant. True salmon flower. 8 in. to 18 in.

Light Salmon—Late bloomer. Dark glossy leaves. Large flowers. 8 in. to 12 to 15 in.

L. A. W. Salmon — Midseason. Blooms profusely. Bushy grower. 8 in. to 18 in.

Comte de Neuporte — Early. Low grower—very spready. Large Salmon-pink flower. 8 in.

PINK

Geo. Franc—Early. Large pink flower with dark blotch in center. Bushy grower. 8 in. to 12 to 15 in.

Elegans—Early. Light pink flower. Fast grower with good foliage. 8 in. to 10 in.

Pride of Mobile—Midseason. Large flowers. Watermelon pink. Fast compact grower. 8 in. to 20 to 24 in.

Medium Pink—Midseason. Medium flower. Good grower 8 in. to 10 in.

Princess Isabel—Midseason. Cup shape pink flower shading to deep pink in center. Fast grower. 8 in. to 20 to 24 in.

Harry Viechie — Midseason. Beautiful large pink flower with ruffled edge. 10 to 12 in. to 12 to 15 in. Price same as Japanese and Kurume).

PLANTING AND CULTIVATION

All types of Azaleas can be easily grown if a few instructions will be followed. Azaleas may be planted from the first of October until June. They require a rich dark ^{acid} soil, therefore, no lime should be used. Leaf mould or peat helps to retain an acid condition and also keeps the soil loose and free from packing, as Azaleas do not thrive in a sticky soil. This is why our customers are so well satisfied with our plants, since our Azaleas are grown under these conditions and are not retarded in growth by transplanting and shipping. If there is any clay where you wish to plant Azaleas, remove it, digging a large hole with plenty of space for the roots to spread and about 18 inches deep, loosening the ground 6 inches deeper for good drainage, then fill in with leaf mould mixed with dark soil.

Care should be taken when planting Azaleas, as, they should not be planted any deeper than they were growing at Nursery; the ball of roots being covered with no more than one-half inch of soil, press soil firmly. After planting, water freely and often to keep soil moist until plants are well established. A mulch of leaves, about 2 or 3 inches deep, helps to hold the moisture and keeps the sun from baking the roots, for Azaleas are shallow rooted. They should be watered frequently in dry weather.

Partial shade is best in planting Azaleas, although they will grow in full sunshine, provided they are well mulched with leaves and are watered often. Cotton seed meal is a good fertilizer and should be applied to plants in the spring, after the coll weather is over—but, should not be used later than June.

If these instructions are followed, you will not have any trouble to grow Azaleas successfully. Place your orders now for Azaleas, so that you may enjoy their entire blooming season. When ordering from us you are assured of the best plants.

Our Nursery is located north of Summerville
on State Highway No. 2.
